Testimony

I have used Mike Carter Valuations since 1998 and in that time he has done numerous valuations for my clients, my companies and myself.

During that time I have recommended to my clients his services and there has never been a negative comment made re his service or professionalism.

He has always delivered within the time frames he commits to, which is important when working to tight deadlines or dates. In short he has been fantastic to deal with.

He is very lucky to have his wife working with him, as this has been a real strength to his ability to deliver on time and in a professional and courteous manner.

If you require a valuation then Mike Carter Valuations would be a company that deserves first consideration.
